## What is Xanax?

Xanax is a benzodiazepine that works by enhancing the effects of gamma-aminobutyric acid (GABA), a neurotransmitter that inhibits overactive brain activity. This calming effect reduces anxiety, prevents panic episodes, and stabilizes mood. As a Schedule IV controlled substance, Xanax is safe when used as prescribed. Those looking to **buy Xanax online** must ensure they use licensed and verified online pharmacies to avoid counterfeit products and unsafe sources.
