## What Is Phentermine?

Phentermine is a **prescription-only appetite suppressant** approved by the FDA for **short-term weight management**. It is usually prescribed to adults with:

- Obesity (BMI  $\geq$  30), or
- Overweight (BMI  $\geq$  27) with weight-related conditions like diabetes or high blood pressure

Phentermine works by **stimulating the central nervous system**, reducing appetite and increasing energy expenditure.
