Frequently Asked Questions

Q1. Can I take these medications without a prescription?

No. These are controlled medications. Self-medication can be dangerous.

Q2. How do I safely stop taking them?

Always taper under medical guidance to avoid withdrawal.

Q3. Are these drugs addictive?

Some, especially opioids & benzodiazepines, carry dependence risk.

Q4. Can they be mixed with alcohol?

No. Mixing can cause breathing issues, overdose, or death.

Q5. What if I miss a dose?

Follow doctor advice—never double dose to catch up.

Conclusion

Prescription medications are powerful tools for pain management, mental health, and other medical needs. When taken responsibly under a doctor's supervision, they improve lives. Misuse, however, can lead to serious health risks. Always follow medical advice and avoid unapproved sources.
