### What is Xanax?

Xanax is a benzodiazepine that works by enhancing gamma-aminobutyric acid (GABA), a neurotransmitter that reduces excessive brain activity. This action helps calm the nervous system, prevent panic attacks, and alleviate anxiety symptoms. As a Schedule IV controlled substance, Xanax is safe and effective when used as prescribed. Patients seeking to **buy Xanax online** must ensure they use licensed, verified pharmacies to avoid counterfeit products or unsafe sources.
