Oxycontin 40mg Dosage and Usage Overview

Form	Strengths Available	Usage Category
------	---------------------	----------------

Tablets	10mg, 20mg, 40mg, 60mg, 80mg	Severe chronic pain relief
---------	------------------------------	----------------------------

Oxycontin 40mg is typically prescribed for individuals requiring **around-the-clock opioid therapy**. It should be swallowed whole—**not crushed, broken, or chewed**—as altering the tablet may release the drug too quickly, leading to serious side effects or overdose.

Always follow your **healthcare provider's instructions** for dosage and timing. This medication should be used **only under strict medical supervision**, especially for patients with prior opioid exposure.
