★ Important Safety Tips Before Using Alprazolam

➡ Always follow your doctor's advice

This medication affects the central nervous system, so proper supervision is important.

➡ Avoid alcohol and sleeping pills

Combining them with Alprazolam can cause excessive drowsiness and slow breathing.

➡ Don't drive or operate machinery

The calming effect can reduce alertness.

➡ Don't stop suddenly

Alprazolam should be reduced slowly if your doctor asks you to stop.

➡ Inform your doctor if you have:

- Breathing issues
- Liver problems
- Depression
- Previous dependence on substances

➔ **Store safely**

Keep it away from kids or anyone who may misuse it.
