Uses

Oxycontin is prescribed for long-term management of moderate to severe pain. It is especially effective for conditions requiring continuous relief, like arthritis, nerve pain, or injury recovery.

Dosage

Usually, 10 mg to 40 mg tablets are taken every 12 hours as per doctor's advice. Do not crush or break tablets; swallow them whole with water.

Side Effects

Possible effects include nausea, mild drowsiness, or dry mouth. Serious side effects are rare when used as prescribed. Avoid alcohol and other opioids.
