What Is Xanax 1mg and How It Works

Xanax (Alprazolam) belongs to the **benzodiazepine** class of medications. It works by calming the central nervous system, helping reduce symptoms of anxiety, panic attacks, and stress-related tension. The 1mg dosage is commonly prescribed for moderate anxiety conditions and provides fast-acting relief under a doctor's supervision.

When taken as prescribed, Xanax helps restore calmness, improve focus, and support emotional balance — making it one of the most recommended medications for short-term anxiety management.
