Uses

Tramadol is widely used to treat moderate to severe pain and can be prescribed for chronic conditions such as arthritis, post-surgical pain, or nerve damage. It works by altering how your brain perceives and responds to pain.

Dosage

The standard dose ranges from 50 mg to 100 mg every 4–6 hours, as directed by your physician. Avoid exceeding the recommended dose and follow your doctor's instructions carefully for safe use.

Side Effects

Common side effects include mild nausea, dizziness, or constipation. Staying hydrated and taking the medication with food can reduce discomfort.
